# This is design by Mika

**Design by Mika is the brainchild of Mika Rinta-Suksi. Mika is from Finland, but has been living in the UK since 1998. “Design by Mika seeks to broaden Scandinavian design in lighting, furniture and different products, with ideas collected from around Scandinavia and the world. We have sought to be innovative and mystical in our designs whilst keeping the products practical.” Mika**

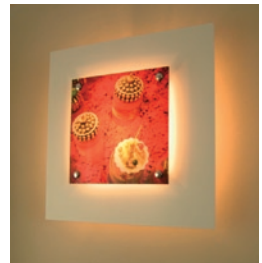

## Lighting Boards

Deciding on your wall coverings is an important decision and one worth getting right. Do you choose a painting, photograph, light fitting or bold colour scheme? With Lighting Boards you can achieve much of this and more. Lighting boards combine light and art to set a mood and can be as bold or as understated as you wish, depending upon your preferred effect. With a choice of different shapes and colours you can achieve a unique focal point in any room. The Boards are interchangeable, which gives you flexibility to experiment with your look without too much effort.

- Our products fall into every price bracket.
- Cool designs, different shapes, colours and options allow you to design your own bespoke lighting product without paying over the top prices.
- They offer visual art and lighting in one product.
- We are supporting EU industries by using EU skills and machinery to produce all of our products to the highest standard.

# Eclipse Lighting Board

The Eclipse Lighting Board is designed to combine art and light in one product. It has a universal wall bracket on which you can attach all of our different designs. This allows you to change the fascias at a later date or swap different fascias between rooms. The standard Lighting Board is made from two solid panels. The central panel can be finished in different materials and colours. The look can be changed to suit your interior by changing the central panel to glass or acrylic or by adding a canvas print or mirror.

- Change the look of your space in minutes by changing the fascias without the need of a tradesman.
- All of our current, future and bespoke designs will fit onto the same wall bracket that holds the light fitting. This product will not become obsolete!
- The light sizes are approximately 50cm x 50cm.
- Visit our web site to get information on our latest designs.
